THE MARION DAILY STAR.

VOL. XII. NO 122. MARION, OHIO, THURSDAY, APRIL 4, 1889. PRICE, 3 CENTS.

Work of the Senate.

What Was Accomplished at the Special Session.

THE NOMINATIONS ACTED ON.

A Comparison With Previous Administrations—White House Callers—Bids Opened for Coast Defense—Washington Notes.

WASHINGTON, April 4.—The executive clerk of the senate has issued the following official statement: During the special meeting of the senate just adjourned, there were sent to the senate 504 messages containing nominations aggregating about 570 names. Of this number two were rejected, namely: Murat Halstead, who was nominated minister to Germany, and Mr. Isadore Loventhal, the postmaster of Modesta, Cal.

The following failed of final action: William H. Whiteman, justice supreme court of New Mexico; Edward Kurshner, marshal for the district of Louisiana.

Postmasters: C. Walters, Minot, Dak.; Samuel C. Moore, Findlay, O.; Robert F. Bebout, Rushville, Ind.; Carl C. Crippin, Eustis, Fla.; Burt C. Drake, Gainesville, Fla., and George E. Nicholson, Ness City, Kansas.

Four years ago President Cleveland sent 148 messages to the special session, eighteen of the nominations failed of action and one was rejected.

In the last session of Mr. Hayes' administration he sent 680 messages to the senate. Three of his nominations were rejected and 106 failed of action.

Callers at the White House.

WASHINGTON, April 4.—The almost ceaseless tramp of feet sounded on the stairs of the White House all forenoon. Ex-Senator Riddleberger was among those that called. Col. George W. F. Vernon, Commodore W. S. Schley, of the navy, and five others, representing the Union Veteran association, invited the president and cabinet to attend the annual banquet of the organization at Baltimore April 9. The president replied that, owing to the indisposition of Mrs. Harrison and the illness of his little grandchild, "Baby" McKee, he would be unable to make any definite arrangement for this month except to attend the Washington inaugural centennial ceremonies at New York on the 30th inst.

The Louisiana delegations came to press candidates for public offices in their state. One of these was composed of Republican members of the Louisiana legislature. Nearly all of them were colored men. Senator Blackburn came late in the forenoon and introduced a Kentucky delegation.

Bids for Coast Defense.

WASHINGTON, April 4.—Bids for the construction of the armored coast defense vessel provided for by congress, were opened at the navy department yesterday. Cramp & Sons, of Philadelphia, bid $1,611,000; the Union Iron works, San Francisco, $1,628,950; N. F. Palmer & Company, New York, $1,630,000. The vessel is to be 256 feet long, 59 feet broad, 1,400 tons displacement. She will be protected by a belt of steel armor sixteen inches thick over the engines, boilers and magazines and eight inches thick forward and aft. The engines are to have 4,400 horse power.

Knew It but Said Nothing.

WASHINGTON, April 4.—The information telegraphed last night from Pensacola, Fla., that the United States steamer Brooklyn had broken her shaft and was proceeding to this country under sail was not known to the navy department officials. The department been informed over a month ago that the shaft was broken, and on Sunday a dispatch was received from the commander of the Brooklyn, stating that the vessel had arrived at St. Thomas, West Indies. The Brooklyn will reach New York about April 15.

A New Steamer Mail Line.

WASHINGTON, April 4.—The postmaster general is advised that a new line of steamers to ply semi-monthly between Port of Spain Trinidad, off the coast of Venezuela, South America, and New York, has been put on by an agreement between the government of Trinidad and Turnbull, Stewart & Company. The government pays the contractors £5,000 per year for seven years. The steamers began their run on April 1.

Starts West.

WASHINGTON, April 4.—Senator and Mrs. Stanford left for their home in San Francisco yesterday afternoon. They will remain in San Francisco for four weeks and then start for Alaska. This will occupy six weeks. Justice and Mrs Field will accompany them to Alaska. The remainder of the vacation will be occupied in furthering the building of the university that is now nearing completion.

Destitute Shipwrecked Sailors.

WASHINGTON, April 4.—The state department has received a cablegram from Consul Connelly, at Auckland, New Zealand, stating that the ship Red Cross, of Maine, Capt. Richmond, had been wrecked at Raratonga, and that nineteen men were destitute at Auckland. The consul was directed by cable to give the men all necessary aid.

Senators on a Trip.

WASHINGTON, April 4.—Senator Hoar's special committee on relations with Canada will meet in Chicago on May 3, and proceed west to Seattle and Tacoma, returning by way of the Canadian Pacific road. The senators who expect to go on the trip are Hoar, Wilson of Iowa, Hale, Dolph, Pugh, Butler and Voorhees.

Declined the Corean Mission.

WASHINGTON, April 4.—Hon. W. O Bradley, of Kentucky, has declined the Corean mission, to which he was nominated by the president. He called at the White House today and told the president that his business interests would not permit him to exile himself to such a distant land.

Washington Notes.

Mr. Farrill, of Texas, the new minister to Belgium, took the oath of office at the state department yesterday.

W. T. Brock, late chief clerk of the pension office, has been appointed assistant chief of division in the same office.

Capt. A. T. Mahan and the other members of the commission appointed to select a site for a navy yard on the northwest coast, have returned to Washington.

The secretary of state has received telegraphic information from Consul Allen, at Kingston, Jamaica, of the sale of our American syndicate of the entire Jamaica railway system of that island.

INJURED BY A FALLING WALL.

Two Girls' Narrow Escape From Instant Death in Montreal.

MONTREAL, April 4.—The southwest portion of Clark's sausage factory on the canal bank, Point Charles, fell in yesterday. The building comprised three flats, the southern walls of which were driven out into the yard by the precipitation of the heavy roof. Eaza Marling and Kate Byrnes, two young women who were employed in the fluid beef department, and who were working on the second flat when the accident occurred, were seriously injured. The crash of the falling building alarmed the employes, sixty in number. The two girls were found buried under two large iron tanks and quickly extricated, but both were unconscious.

Kate Brynes was badly cut about the head and her legs, upon which one of the tanks rested, were severely cut. Eliza Marling was cut about the face and injured internally. A man named Wood, working in the same apartment with the girls, had presence of mind at the time of the wreck to cling onto a table fastened to the floor and escaped injury. George Brown, another workman, was in the basement and had a narrow escape. He jumped and avoiding a large pile of falling masonry which fell at his feet, he escaped with a bruise on the back.

The Affairs of Samoa.

An Interesting Interview on the Subject.

WHAT THE NATIVES THINK.

The Present Standing of the United States with the Samoans—Accounting for the Recent Hurricane—The Probable Result of the Present Trouble.

WASHINGTON, April 4.—G. W. Griffin, consul at Sydney, N. S. W., and formerly United States commissioner to Samoa, has just returned to the United States via Samoa, where he stopped March 1. In an interview in The Press, he says:

"Whichever party the United States supports will be supreme in the Samoan islands, because the Samoans like the people of this country. The United States have never oppressed nor fined the Samoans, while the others have. England fined them $10,000 for firing on marines at the time of the arrest of Col. Steinberger. The English offered to forgive them, however, if they would sign a treaty giving England full control. I advised them to pay the fine and not sign the treaty, which they did. The Germans have also levied and collected heavy fines for alleged outrages on German subjects."

"How do you account for the recent disastrous events in the harbor of Apia?"

"The harbor at Apia, where the white settlement is, is one of the most exposed. In fact, it is practically no harbor at all except during the months from May to October. This fact has really been one of the great drawbacks to the settlement of Island Opolu, one of the largest and most fertile of the group. On several occasions the entire shipping in the harbor has been wholly destroyed by hurricane, and during the months from November to March the men-of-war present usually kept up steam in order to be in readiness to put to sea. If the English steamer came out safe it is due to this fact or perhaps she occupied a more favorable position for egress."

"Why did not the men-of-war lie to at Pago Pago?"

"Simply because there is no settlement there of any importance, and the native capital is on the Island of Upolu sixty-five miles from Pago Pago."

"What do you think, Mr. Griffin, will be the outcome of the negotiations of a commission?"

"That the autonomy of the islands will be maintained and the treaty relations will be secured to us. We hardly want anything further than the friendship of the islands, their trade and commerce—but are desirous that they shall have a separate government of their own similar to that at Hawaii."

Samoan Mail Forwarded.

SAN FRANCISCO, April 4.—The navy pay office in this city has been ordered by the Washington authorities to forward to Samoa all mail matter for naval officers now there. This order seems to indicate that Admiral Kimberly, and all officers, except those who came here in charge of men, will remain at Apia for some time to come.

The cruiser Charleston is almost ready for sea. The trial trip will probably be made in two weeks.

The Charleston's Guns.

BALTIMORE, April 4.—The American's special from Annapolis says: The 8-inch guns for the Charleston, now being cut at San Francisco, are now lying on the sea wall of the naval academy. These guns have been tested and were not found wanting. They will be shipped to San Francisco at once.

The Olga Not Destroyed.

BERLIN, April 4.—It is rumored that the government is in receipt of information that the German war vessel Olga, which, with her companion ships and the American vessels, was driven ashore in the recent hurricane in the waters of Samoan islands, has been floated and is comparatively uninjured.

A Moonshiner Killed.

BENFIELD, W. Va., April 4.—Detective W. G. Baldwin, of the Eureka agency, Charleston, W. Va., and two assistants, Eugene Robinson and Joe Wallace, shot and killed William Moran, a moonshiner, last night, on Tug river, near the county lines of McDowell and Boone. They had been after him for two weeks. The officers fired fifteen shots before.

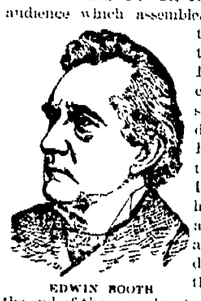
Mr. Edwin Booth Ill.

He is Taken Sick on the Stage at Rochester, N. Y.

THE AUDIENCE DISMISSED.

Mr. Lawrence Barrett Announces Mr. Booth's Illness from the Stage of the Theatre in a Feeling Speech—The Company Cancel Their Engagements and Return to New York.

ROCHESTER, N. Y., April 4.—The large audience which assembled at the Lyceum theatre last night to see Booth and Barrett in "Othello" experienced a sad shock and bitter disappointment. Booth went on in the first act as Iago, and spoke his lines without apparent difficulty and the audience did not suspect anything wrong. At the end of the second act, when it was time for him to go on again, a slight dizziness, with which he had been troubled for two or three days, began to be serious and a physician was called in who examined the actor, and pronounced his illness too serious to permit him to attempt to go on with the performance.



EDWIN BOOTH

The doctor expressed fear that he had sustained a shock of partial paralysis, which so alarmed Mr. Barrett that he determined to dismiss the audience. Mr. Barrett was greatly overcome by what he considered the dangerous illness of his colleague, and it was evident that he was deeply excited. Mr. Barrett spoke as follows, his utterance frequently choked by his emotions:

"LADIES AND GENTLEMEN: I am called upon to perform the most painful duty of my life. My colleague has shown symptoms of breaking down for three or four days past, and his condition to-night is so serious that it is impossible for him to act. We had hoped that he would rally from this attack and that he would be able to play his part to-night, but one of your physicians, Dr. Sumner, says that it would be perilous for him to attempt it. Mr. Booth has sustained a partial stroke of paralysis, and we fear that this is the beginning of the end. I cannot express to you the deep sorrow with which I make this sad announcement. The world has probably heard for the last time the greatest actor who speaks the English language.

LAWRENCE BARRETT.

"We shall, of course, cancel all engagements, and I hope that we shall be able to remove Mr. Booth to his home. It pains me to speak these words. I am sorry to disappoint this great audience, but the play cannot go on. It would be presumptuous for me to undertake to fill the place of this great man whom you have come to see and hear, and it would be worse than useless to attempt to proceed further. I know you will be indulgent and that you will fully appreciate the sad plight in which we are placed. The management will make such arrangements as may seem best for refunding your money."

The condition of Mr. Booth did not fully justify this speech. There had been no attack of paralysis and the actor was suffering no pain. He walked from the theatre to his carriage and was driven to his hotel, when he walked without apparent difficulty from the carriage to the elevator, and to his room. Reporters were not allowed to see Mr. Booth, and Mr. Barrett refused to talk, but Mr. Brownlee, business manager of the company, said that Mr. Booth's illness was not serious enough to justify alarm. He said that the engagements for the week, and possibly next, would be canceled, but he hoped to go as usual after Mr. Booth had been given a brief rest.

The company arrived in this city yesterday morning and Mr. Booth passed the day laying down in his room, but did not seem to be suffering except from the weariness of travel. Messrs. Booth and Barrett will leave for New York at once, and Mr. Booth will be placed at once in charge of his own physicians. The Lyceum theatre management loses $2,000, which will have to be made good by the company. The sale of seats amounted to $5,000 and was the largest sale the company had had this season.

AN EDITOR AND A GOVERNOR.

They Indulge in a Disgraceful Fight at Charleston, W. Va.

CHARLESTON, W. Va., April 4.—While Editor Reber, of The State Tribune, was standing in a grocery store last night Governor Wilson came in. He approached Mr. Reber, shook his fist under the editor's nose and used very threatening language. Finally Mr. Reber's blood reached the boiling point, and soon editor and governor were locked in close embrace.

The men were quickly separated by other men who were in the place, and the grocer, who, it is understood, has no good feeling for Governor Wilson, ordered him to get out of the store. The chief magistrate refused to leave, and the grocer thereupon forcibly ejected him to the street. The belligerent attitude of the governor was due, it is alleged, to a hostile feeling manifested by Reber towards him for the past six weeks.

Death of an Army Officer.

NEWBURG, N. Y., April 4.—Col. George A. Williams, retired, U. S. A., died at his home here last night. His death was probably in no small degree to injuries sustained a quarter of a century ago at Vicksburg. He leaves a widow and son, a New York lawyer.

SHERIFF SHOT

While Attempting to Arrest an Ex-Convict for Assaulting a Woman.

CHATTANOOGA, Tenn., April 4.—Sheriff S. P. Greenlee, of Grainger county, East Tennessee, was killed last night, near Rutledge, in attempting to arrest John Walfenbarger, an escaped convict. For some months he has been at his old home, and no attempt was made to arrest him. A few days ago he assaulted a woman, who swore out a warrant for him, and placed it in the hands of the sheriff.

Last night Greenlee found his man in company with another fellow hiding with a woman and a boy. They were all in a stable and heavily armed. The sheriff demanded their surrender, and they opened fire on him, which he returned, wounding all four of them. Over a hundred shots were fired, and when the fight ceased the sheriff was dead, having been shot through the heart several times and through other parts of his body. His slayers were finally arrested and put under guard. A crowd from the sheriff's home have gone to lynch the prisoners, and will probably succeed.

BELLIGERENT LAWMAKERS.

A Disgraceful Scene in the Tennessee Legislature.

NASHVILLE, Tenn., April 4.—While the journal was being read in the house yesterday, Representatives Whitthorne and Joiner had an altercation over the passage of a senate bill in the house last night to change the line between Lewis and Lawrence counties. Mr. Joiner, who was opposed to the bill, was not present when the bill was passed, and no doubt thought Mr. Whitthorne, who called up the bill and had it passed, had done him an injustice. Some words were passed, when they clinched and commenced shoving each other up and down the aisle. Friends interfered and the excited members were separated.

Just after the house adjourned at noon, Representatives Johnston and Follett had some misunderstanding and would have come to blows had not Representative Bontam jumped in between them. The difficulty occurred over the medical bill that was passed by the house yesterday.

HE REMOVED THE GUN,

But Not Before Emptying One Barrel Into a Man's Neck.

LONDON, O., April 4.—At 1:30 yesterday Arza Ballenger walked into Mary Ann Donnelly's saloon with a double-barreled shotgun in his hand. He laid it across the counter, when, according to an eye-witness, Pete Donohue, the bartender, Mrs. Donnelly's brother, told him to "take that gun away," whereat Ballenger raised the gun and fired a barrel into Donohue's neck, tearing a large gash. Ballenger then coolly walked out and in a few minutes was arrested.

Both are young men, Donohue being about 19, and neither has a desirable reputation. The saloon where the shooting occurred is considered the worst place in town, and is before the public about every week with some affray or unseemly occurrence, and this last tragedy caps the climax. Dr. Moffet, who was called to attend Donohue, says that the wound not necessarily fatal unless blood-poisoning should set in.

Passenger Conductors Removed.

BRADFORD, Pa., April 4.—A sensation was created in railroad circles here by the removal of all the passenger conductors on the Buffalo, Rochester and Pittsburg railroad. The sweep, it is rumored, was a thorough one. The conductors received polite letters asking them to resign, and yesterday their resignations came in. Freight conductors, it is said, will be promoted to passenger trains. General Superintendent Bartlett returned from Rochester late last night. He declined to be interviewed. He said to a United Press reporter, "I have just returned from a long journey and am too tired to talk." The local officials do not have anything at all to say about the wholesale slaughter of conductors.

Locked Up in Jail.

NEWARK, N. J., April 4.—The girls, Henrietta and Emma Day, who were arrested in Summit last night, charged with arson, were arraigned to-day. The younger, Henrietta, first pleaded guilty, but hearing her sister plead not guilty, she changed her plea. Both were taken in a carriage to jail, Henrietta fighting the constables so fiercely that her arms had to be pinioned. The girls guilt became known through a constable who was on intimate terms with one of them.

The Albany Evening Journal Sold.

NEW YORK, April 4.—William J. Arkell Tuesday sold The Albany Evening Journal to William Barnes, proprietor of The Albany Express. Mr. Barnes is a descendant of Thurlow Weed, the founder of The Journal, and by this sale the property reverts to the family of the original owner. The sale was arranged and the property transferred and paid for Tuesday. There will be no change in the political complexion of The Journal, remaining Republican.

Rev. Dr. Beecher Injured.

BROOKLYN, April 4.—Rev. Dr. Edward Beecher; age 185 years, a brother of the late Henry Ward Beecher, fell beneath a train last night and his left leg was run over and crushed. Dr. Beecher was returning from Parkville, where he is pastor of a church. He alighted at the Twentieth street station before the train stopped, and made a misstep. He was taken to the Seney hospital. Owing to his advanced age the injury may have serious consequences.

Tramps Injured in a Railroad Wreck.

RICHMOND, Ind., April 4.—Near Harvey's, this morning, a freight train on the C., St. L. and P. railroad became detached from the engine at the top of a steep grade, and backed into the second section, demolishing the locomotive and nine cars. Six tramps were badly hurt, among them being Fred. Dowd, who claims to be a printer from Washington, and Henry Bannon, who says his home is Cincinnati. The train men escaped by jumping.

Stolen Mail Recovered.

NEVADA, Col., April 4.—A United States mail bag and a number of letters were found by a party of gentlemen while hunting near this place. Many of the letters contained money orders and greenbacks. It is believed that the sack was taken by the highwayman who held up the Nevada and Downieville stage recently.

From Foreign Climes.

General Boulanger Leaves France and Goes to Belgium.

HE IS FLEEING FOR LIFE.

He Won't Stand Trial by the Senate, as it May Mean Death—A Manifesto to the French People—Old King John Reported Dead — Other Happenings Abroad.

BRUSSELS, April 4.—Gen. Boulanger and M. Arene, a member of the French chamber of deputies, has arrived at Mons, Belgium. They were met at the railway station by M. Rochefort. The party then repaired to the Hotel Monarque, where they held a conference.

Gen. Boulanger has issued a manifesto from Brussels to the French people. He says that he will not submit to a trial by the senate, but that he is willing to be tried before magistrates or a jury. In conclusion Gen. Boulanger says he will await the elections, which will make the republic habitable, honest and free.

The Presse says that Gen. Boulanger left Paris at the request of friends who were informed that he would be tried by an exceptional tribunal and that he would not escape alive. During his absence Gen. Boulanger will continue the struggle for a revision of the constitution.

M. Harry, the principal editor of The Independence Belge, expresses himself freely on the subject of Gen. Boulanger's taking refuge in Belgium. The Belgian government, he said, will certainly expel Boulanger without delay, if he does not forestall such action by voluntarily taking his departure. M. Harry called attention to the fact that Belgium had heretofore expelled all prominent political refugees, including Victor Hugo, and declared that the policy of the government with reference to that class of persons had undergone no change.

The national committee of the Boulangist party announces that that body, with only four dissenting votes, passed a resolution advising Gen. Boulanger to leave France. M. Thieband, the principal election organizer of the Boulangist party, and Deputy Michelin have withdrawn from the committee as a protest against Boulanger's flight, and M. Thieband has also announced his intention of retiring from the editorship of La Cocarde, as he is disgusted with the secrecy which the general adopted. The Bonapartists approve the flight of Boulanger, while the Royalists accuse him of cowardice.

King John Dies From Wounds.

ROME, April 4.—Rumors have reached here of the death of King John of Abyssinia, from wounds which he received in a battle with the dervish Mottoma.

It is expected, if the report of the death of King John, of Abyssinia, is true, that trouble will ensue in the matter of succession, as the king had no heir.

Worse and Worse.

AUCKLAND, N. Z., April 4.—The recent hurricane in the South Pacific ocean, caused great damage on the Island of Tahiti. Parts of the island were submerged, and many persons were drowned. On the Island of Tonga the hurricane created great havoc. Thirty persons perished there in the storm.

Whisky Trust in Dublin.

DUBLIN, April 4.—The American plan of monopolizing the production and sale of marketable commodities, has spread to Ireland, an enormous whisky trust having been formed in Dublin. It is understood that the capital involved in the pool is all Irish.

Foreign Notes.

Emin Treitel, a large grain dealer of Berlin has failed. His liabilities are 6,000,000 marks.

The London Daily News says the Irish prison board has revised the rules governing jails in Ireland.

The Bavarian general, Methlhauer, who became famous in the attack upon Bugneur, in the Franco-Prussian war, died yesterday, aged 73.

It is stated that the Sultan of Turkey has discovered the existence of a plot to depose him and place his brother and heir upon the throne.

The silk dyers of Zurich have gone on a strike, in sympathy with the German members of their craft, whose strike threatens to be unsuccessful.

AN EPIDEMIC OF SUICIDES.

Just at Present Pittsburg is Making Such a Complaint.

PITTSBURG, Pa., April 4.—Pittsburg and vicinity is suffering this week from an epidemic of suicides. There have been eight attempts within a few days. The two unsuccessful self-assailants are now prisoners in the Central police station.

Early yesterday morning Mrs. Herman Flechsig, the young wife of an Allegheny business man, committed suicide by hanging from the rafters of a porch at their residence on Webster street. On her person was found a letter addressed to her husband, showing that she had been worrying over the idea that she was afflicted with cancer. The previous evening she read and conversed about the suicide of a young woman in this city that occurred that day. Up to the hour for retiring she was lively, and talked over plans for arranging their new home into which they had just moved.

Effect of a New Tramp Law.

AUGUSTA, Me., April 4.—The first case under the new tramp law came up on Monday at Biddeford, where three penniless wood choppers, on their way to Massachusetts, applied for a night's lodging at the station house. They were arrested, and although showing no viciousness, were sent by the recorder to sixty days in jail, the law giving him no alternative. The severity of the statute is generally condemned and its constitutionality may be tested.

Peace Seen to Be Restored in Hayti.

NEW YORK, April 4.—Jimenes, Hauteilt & Company, the New York representatives of Hippolyte, say they have information that Hippolyte is satisfied with terms proposed to him by Legitime, and that peace will probably be restored in Hayti soon.

FRESH FROM THE WIRES.

News in Brief From All Parts of the Country.

Mary Anderson sailed for Europe yesterday.

Shelbyville, Ind., will soon have electric lights.

There is a street railroad strike at Rochester, N. Y.

Switchmen in the Erie yards at Buffalo, N. Y., are on a strike.

There is a strange disease among horses in Vermillion county, Ind.

Two deputy sheriffs were killed by train robbers near Flag Staff, A. T.

The North Indiana Methodist Episcopal conference is in session at La Grange.

The legislature will be asked to authorize Mt. Gilead, O., to bore for natural gas.

One thousand eight hundred and seventy immigrants landed at Castle Garden yesterday.

A free bridge will be built across the Tennessee river, at Chattanooga, at a cost of $200,000.

Farmers of Platt county, Ill., are holding mass meeting to protest against the binding twine trust.

Jefferson Medical college, Philadelphia, graduated 212 professors of the healing art Wednesday.

The Musical union, of New York, is trying to prevent the landing of strolling bands from Europe.

Professor William Gammill, LL.D., president of the Rhode Island Historical society, died on Wednesday.

Mrs. Betsy Thomas, aged 55 years, committed suicide near Akron, O., by jumping head first into a well.

Mrs. Lydia Noble, becoming despondent, because of sickness and poverty, committed suicide by hanging, at Cincinnati.

James E. Welch, engineer, and Winfield S. Stier, conductor, were acquitted at Rockville, Ind., of causing the Tuscarora disaster.

Sarah Kelly, insane, of Reno county, Kan. en route to the Topeka asylum, jumped out of a car window, and fractured her skull. She will die.

John Booth, a Richland county, O., farmer, during his wife's absence, packed up the household furniture and left, taking with him about $700 belonging to her.

Benjamin Riley, while working in a saw mill at Greensburg, Ind., had an arm so badly mangled by being caught in the belting that amputation was found necessary.

Frederick Winsor, lately superintendent of the fire department at St. Johns, N. F., eloped with a Mrs. Garrott, leaving a wife and four children. The couple sailed for Baltimore.

George Cooper, who killed his wife in Portland, Conn., pleaded guilty of murder in the second degree, and was sentenced to state prison for life. Charles U. Ellsworth, charged with infanticide in Haddam, pleaded guilty of manslaughter and was sentenced for six years.

There is a concerted action of DesMoines river land settlers to forcibly regain possession of lands from which evictions were made last fall. A small army of men and teams, with machinery and seeds, will make a tour of the entire river land district and sow crops wherever evictions have been made.

Temperance Movement in Kentucky.

GREENWOOD, Ky., April 4.—The popular movement against the sale of intoxicating liquors has extended to the mining town of Beaver Creek, about seven miles east of this place, having rail connection with the Cincinnati Southern railroad over the Beaver Creek and Cumberland River Coal Company's railroad. A large and enthusiastic meeting was held at the school house at Beaver Creek last night, at which Dr. G. W. Riddish presided. A number of speeches were made severely censuring the county authorities for their failure to enforce the laws. A committee of twenty-one was appointed to secure the eradication of the evil, and to notify the saloon keepers to close their doors forthwith. A novel feature of this movement is that it has originated among the laboring class, those who contribute more to and suffer most by this traffic, but who are generally so blindly indulgent of it.

An Attempt at Train Wrecking.

PITTSBURG, Pa., April 4.—Shortly before the time for the arrival of the limited express train No. 5, on the Pittsburg, Fort Wayne and Chicago railroad at Louisville, O., a track walker discovered several splice bars wedged into a frog near that place, in such manner that a disastrous wreck would have resulted. The obstruction was removed and the railroad officials are on the hunt for the perpetrators.

The Steamer Nanticoke All Right.

BOSTON, April 4.—News has been received here of the arrival at Key West of the steamer Nanticoke, which was supposed to have been in collision with the Haytian gun boat Conserva, off Norfolk last week. Until the receipt of this news, neither of these vessels had been heard from since the supposed collision. All on board the Nanticoke were reported well. No other particulars are given.

Wind and Fire.

MINNEAPOLIS, April 4.—The Journal's Marshall, Minn., special says: The worst wind storm ever experienced in this section visited Marshall yesterday afternoon. The air for several hours was laden with dust. A prairie fire six miles west of here destroyed all the buildings on W. Keith's farm. The loss aggregates several thousand dollars.

Burglars Break in a Bank Safe.

PLYMOUTH, O., April 4.—Early yesterday morning burglars broke the safe at the First National bank at this place, secured about $1,000 in cash and made good their escape. The town is much excited over the affair.

A Whirlwind in Baltimore.

BALTIMORE, April 4.—A whirlwind visited Baltimore yesterday evening and unroofed a number of houses, and blew down chimneys. The schooner Nellie was capsized in the Patapsco and wrecked. The crew were saved.

A Frame Building Destroyed.

OAKLAND, Md., April 4.—A fire here this morning destroyed the large frame building belonging to O. H. Pritchard. The loss is about $5,000, divided between F. G. Hyde, jeweler, and Mr. Pritchard.

ROYAL

BAKING POWDER

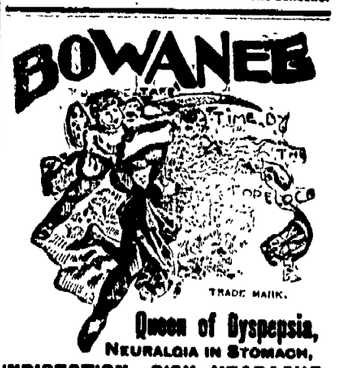
Absolutely Pure.

This powder never varies. A marvel of purity strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitudes of low test, short weight alum or phosphate powders. SOLD ONLY IN CANS. ROYAL BAKING POWDER CO. 106 Wall St. N. Y.

POLISHES Furniture LUSTRINE CLEANS Furniture

REMOVES SCRATCHES, STAINS, &c. from House, Office, Hotel, Church and School Furniture. 25c., 50c., AND $1.00 BOTTLES. SOLD BY DRUGGISTS, GROCERS AND FURNITURE DEALERS.

BOWANEE



Queen of Dyspepsia,

NEURALGIA IN STOMACH,

INDIGESTION, SICK HEADACHE,

CONSTIPATION, NERVOUS DEBILITY,

AND ALL TROUBLES ARISING FROM A DISORDERED STOMACH.

Try it, and you will find for once you have not been deceived. For sale by your druggist.

BOWANEE MEDICINE CO., Dayton, Ohio.

A Seized Whaling Bark.

NEW BEDFORD, Mass., April 4.—The barkentine Moses B. Tower, which arrived here to-day, brought the first and third officers of the whaling bark Mary Frazier, of Edgetown, Mass., which was seized at Foyal some months ago for alleged violation of the Portuguese customs laws in smuggling tobacco at the island. At the time the Tower left Foyal the Frazier was still held. Most of the crew had deserted. The captain and two men remained aboard, waiting orders from the owners.

FINANCE AND COMMERCE.

Quotations for the Money, Stock, Produce and Cattle Market for April 3.

NEW YORK, Money 4@4½ per cent. Exchange steady; governments steady.

Currency sixes, 120 bid; four coupons, 123¾ bid; four-and-a-half, 104 bid.

The stock market opened strong and in the early dealings on a steady buying of some of the leaders prices advanced ¼ to ¾. Just before the first call a drive was made at the coal shares, and on a vigorous selling of those stocks the early advance was more than lost. Prices went steadily down during the rest of the morning, and at noon were ¼ to 1⅝ per cent. below those of yesterday. The market has since been dull but steady.

THURSDAY, - - - APRIL 4.

BOULANGER has given the French Senate the slip and gone to Brussells. He refuses to be tried by the Senate for conspiracy against the Government. The trial, however, will, it is said, proceed in his absence, and it is at first somewhat difficult to understand why he should leave, unless under an expectation that he would be deprived of his liberty during the trial, or restrained from issuing manifestos. One thing is certain, the government may be expected somewhat summarily to destroy itself or Boulanger. Which depends upon the case it makes against him rather than the judgment it may pronounce.

PROMINENT American capitalists and manufacturers are waking up to the fact that something should be done to develope our trade relations with the South American States. At a meeting held in New York recently steps were taken looking to this end. By energetic measures England and Germany have heretofore enjoyed a monopoly of this trade, but it will not be long until the United States will get her share. The expenditure of money in this direction will yield a hundred-fold in a few years.

WE are not sure of the fact, but it is current rumor that the publisher of the "official" organ and his Mugwump ally worked for Dr. Thomas' defeat in the Third Ward. Of course the "organ" can satisfactorily explain this party treachery, and it is essential that it should

THERE seems to be a very general move in prominent Republican circles to make M. Halstead Papa Payne's successor in the Senate. This would be a just move since Halstead's rejection, and it would do something toward settling the fuss in Ohio.

MARION can soon claim free postal delivery and the change is desirable for the name of thing is not for its added convenience. But we don't hanker much after city airs so long as we are forced to call great Marion "a village."

MT. GILEAD talks of boring for gas When they shall have spent their enterprising energy in vain there will be another cord in the bond of sympathy between Marion and the Morrow County seat. Both weep over the defunct Black Diamond.

STRIKES are unusually scarce at this season, and the fact affords ground for congratulation. The people who indulge in strikes are gradually learning of the wisdom there is in letting them alone.

THE Republicans can't find much consolation in the Spring election. In Ohio the ill-success may be a timely warning to hustle or get left the coming fall.

Ruined by Fire.

DENVER, Col., April 4.—The stocks of the Golden Eagle Dragoon's company and of T. S. Croke, carpet dealer, were ruined by fire last night. Loss about $50,000, partially injured.

Jumbo's Skeleton.

BOSTON, April 4.—The mounted skin of "Jumbo," presented to the Museum of Natural History at Tuft's college by P. T. Barnum, has arrived and been placed in position.

Furniture Factory Burned.

STAUNTON, Va., April 4.—Bickle & Harrack's large furniture factory and store was burned early this morning. It was of incendiary origin.

THE CITY COUNCIL.

Considerable Business Before the Body But Little Disposed Of—Adjourned for One Week.

The old city Council held its last monthly session Wednesday night, at which all members were present. Many matters of public interest came up for action but most of them were referred to committees.

The Electric Light service was reported upon favorably and the service accepted.

G. W. Robertson presented an ordinance for passage granting him a street railroad franchise on Center street from the C. H. V. and T. R'y crossing to the east Corporation line, and on Main street from the south Corporation line to Farming street, east on Farming to East and north on East to Fair ground. Electric or gas motor power is proposed for running. The ordinance was referred to the Street and Alley Committe.

The petition of E. Huber et al. for the abandonment of certain alleys in the Boulevard addition, for the purpose of giving the Boulevard company additional room, was referred to the Street and Alley Committee.

The plat of C. Habberman's second addition to Marion, north of west Silver street, and also the plat of G. Loffler's second addition was referred to the Street and Alley Committee.

A motion was made by McNeal and carried, authorizing the Mayor to notify Howland & Ellis to begin work on waterworks construction at once.

The Committee on accounts allowed the usual grist of bills, throwing out one of Engineer Hill's for $60 for extras on sewer survey and one of Geo. Crawford & Co. for $26 for publication of Clerk's statement. This latter bill created considerable discussion and will result in a suit for the sum claimed. The Mirror bill for doing the same work was allowed, and the difference in the two cases is that the Mayor ordered the Mirror publication and the Clerk the Independent publication. The law says that the Clerk shall publish it.

The Mayor's report showed that fines in March amounted to $53.10 and hall rent to $23. The Treasurer's report shows a ballance April 1st, of $5491.41.

An adjournment was made to Wednesday, April 10th, when the new council will be organized.

Clifton.

It's all over—the election. They don't come often enough in Ohio.

E. Petty and J. Hiesler's new houses are inclosed.

J. J. Mohr was in Columbus last week on business.

A. C. Brady is about laid up with a sore foot.

Montgomery township republicans got about all they wanted in the way of officers.

Our democratic friends turned out and helped elect Elmer Drake assessor. Thanks.

Ed Johnston has moved from Johnsonville to Clifton. Our population is increasing daily.

Dr. Briggs, of Scott Town, was in town on business.

Tom Charles has appointed Scott Rhoads his private secretary.

Sherm Southwick and Will Tuttle are effecting many sales for the celebrated Deering binder.

Joe Cotteral and family left here Wednesday for Grant, Nebraska, their future home.

Kelly Collins has an attack of acute rheumatism, which almost disables him from walking.

H. E. Hill, of the Scott Town schools, was in town Wednesday circulating among his many friends.

Fred Batchlett and family moved to Kenton Monday, after a two year's residence at Clifton.

Deputy Sheriff Rice was in town twice last week attending to legal business.

Our old friend, Joe Huff, has accepted the position of engineer at the Malleable Iron Works at Marion.

Scott Rhoads started his egg wagon on the road Thursday, with Jimmy Stoutt as conductor.

Jesse Robbins, night operator at C. and A. office, intends to take an extended layoff soon in order to attend court at Winchester, O., at their next session.

Ed Clement, a former Clifton boy, is holding down Hepburn, on C. and A., during the absence of Agent Dewees. We are glad to see Ed get to the front.

Prof. John Barr, Jr., will commence school again Monday, after a vacation of two weeks. His contract includes the summer term.

Section Foreman Charles has vacated the Shiveley property and is now occupying Jacob Huffman's residence, which he rented for one year.

In justice to David Birch we wish to say that he had nothing to do with my Scott Town tom cat article, whatever. It was Joe Spikes' own genuine composition. Nor did we send a friend to say that it was all a joke, which it was, however, but are not saying so for my Scott Town friends' benefit and am ready at any time to try pen's point with the tall sycamore of Tymock, or with the entire faculty, individually or collectively.

We are sorry to learn that Dennis Fahy is not improving as fast as was expected. He has not been so well for a day or two.

Moving seems to be all the go now. Jake Huffman moved to Martel Saturday, and John McCumber to Big Island Monday.

Chris Lippencott and Dave Clifton give an expert hand-organ concert at Agosta, on election day. The two gentlemen will take the road soon with some circus.

The township election passed off smoothly and harmoniously. The Republicans elected their Treasurer and both Assessors. Our Democratic friends elected their candidate for Trustee, Mr. Fred Miller, a good man, over Hiram Cleveland, also a first-class man for the position. We wish to say in a friendly spirit that if our LaRue Republican friends had nominated Mr. Clifton for Trustee he would certainly have been elected. It won't do to want the whole earth—its too big for one end of the township to handle—divide it up, boys, in the future. We will stay with you, however, any way.

April 3d. JOE SPIKES.

NEWSPAPER CRITICISM

Considered Generally, and in a Special Local Case in Response to "S."

We were not a little amused at the spleen exhibited by "S." in Tuesday's Independent, in regard to the very proper and impartial review of the musicale given in Music Hall, last week. He especially takes umbrage at the reference to the piano solo, by Miss Kirkpatrick, and has the very bad taste to charge the writer of the STAR article with "a lack of proper knowledge or a contemptible malice. We beg to inform our misguided and vindictive friend "S.," who so valiantly (if somewhat ignorantly,) wields the cudgel in Miss Kirkpatrick's defense, that it is neither a "deficiency" of musical knowledge or "malice aforethought," that called out the criticism, and we would add for the further edification and instruction of this brave champion, that it is not only the privilege but duty of a public journal to exercise a freedom in such matters, that to all fair-minded people is simply justice. We further claim that an audience or any member of it, paying an admission fee, has a perfect right to pass judgement on an entertainment. This is an undisputed right of a citizen of our free America. There are so many like "S." who seem to think that they are in duty bound to exhaust their vocabulary of adjectives in praise of everyone, regardless of their meritorious deserts. It does not necessarily follow that back of a fair criticism there is "malice," simply because a review does not laud each number. The writer may and usually does, possess the kindest feeling, and regrets the mistakes, yet his duty to the public and the performer, demands a truthful report. Wholesale flattery is ruinous. An amateur appears before an audience and the merits of the performance must be determined by that audience. Many young performers, either in music or other accomplishments, has been entirely spoiled by this wholesale flattery by the press. And one who might become famous and develop into a creditable performer, becomes instead, an egotistical bore, bringing themselves forward on every occasion, subjecting themselves to ridicule and humiliating their friends, when they might, by judicious criticism, have been spurred to greater zeal in study and determination to merit applause. We insist that the journals and newspapers of the day can do no greater good than to truthfully and impartially criticise public performances.

In regard to the enormous and egregious error of mistaking a bunch of Marechal Neil roses for plain every-day "Carnation Pinks," and Chantilly lace and and Moire silk for ordinary "silk grenadine," we find ourselves guilty of an unpardonable offense. In the matter of costumes we recognize the fact that all ladies are more or less sensitive, and although our description was of material more expensive, and the despised "Carnations" are considered quite as elegant, we accept the conviction and charge the fault to our opera glasses. It might be well to have a telescope on such occasions, at least one should be covered with a coat of mail, or be as invulnerable as Achilles to have the temerity to enter the field of journalism and be delegated to review the average musicale. "ALSO."

Eaton Rapids, Mich.

J. M. Loose Red Clover Co., Detroit.—Two years I was afflicted with a very severe at ack of Erysipelas. After two physicians had used their treatment for several weeks and I continued growing rapidly worse, being by this time completely blind, and in their diagnosis concluded that there was no earthly help or hope for me I gave up, having tried all the remedies I knew or heard of. My neighbor, Mr. Miller, came in to see me one day, and said try Loose's Extract Red Clover As he had known of it working remarkable cures. I told him I had lost hope, that nothing would do me any good in this world, he insisted, and taking his hat went to the drug store and bought me one bottle and urged me to try it, which I did. Ten days afterwards I sent for two more bottles and it was wonderful how I improved I continued using it, and today I am better than I have been in years. No sign of Erysipelas has shown itself and I heartily recommend it to suffering humanity as the greatest and best blood purifier in existance Yours Truly,

HENRY MARVIN.

N. B.—My daughter, Mrs Bishop of Toledo, was afflicted almost as badly and your Red Clover cured her

H. M.

Sold in Marion, O., by W. B Foye, Druggist.

Waldo.

Rev. Ashley, of Delaware, will preach for the G. A. R. boys Sunday at 10 a. m. There has been a Sons of Veterans lodge organized here.

Wm. D. Augenstine received a very fine hog from some eastern firm the first of the week.

It is reported that Jacob Denman and Clara Bender were married last week.

We heard that W. A. Sager had applied for the School here for next winter. We hope he will get it, there never was more improvement in the School than when he taught here, he is a splendid teacher and gives his time for the benefit of the School.

S. T. Elliot has stopped canvassing for nursery stock for a few days until after this spring's delivery. He is now husking corn for Mr. Idleman, on the Drake place.

April 4th. SLOCUM.

The Perfection

Of the age in the medical line is the liquid fruit remedy, Syrup of Figs, manufactured only by the California Fig Syrup Company, San Francisco, Cal. It is agreeable to the taste, acceptable to the stomach, harmless in its nature, painless yet prompt and thorough in its action.

Sold by H. C. Hoberman & Co. and L. H. Flocken & Co., druggists.

J. M. Loose Red Clover Co.—Gents: I have been a sufferer for the last five years from Rheumatism across the shoulders, and by using your Fluid Extract Red Clover, am entirely relieved; believe it has driven it from my system, and won't be a weather barometer any longer. Yours Truly.

ARTIFICIAL FERTILIZERS.

Great Improvements in Them During the Past Thirty Years.

Among the other titles to distinction which the Nineteenth century is hereafter to enjoy, one will be found in the fact that in that age agriculture first began to be pursued in a systematic manner with the aid of scientific research. Manuring with the products of the barnyard is a very ancient art, but the resort to the mine for fertilizers is substantially an invention of our own times. Chemists first told the farmer the cause of the frequent speedy exhaustion in the grain producing powers of the soil; it has fallen to the geologist to show whence may be obtained the phosphatic element which is the most quickly exhausted of all the elements of plant food in process of cropping.

Although artificial fertilizers are practically the invention of the last thirty years, the industries connected with their manufacture now demand a capital of about $100,000,000, with an annual product of about that amount, and the volume of the industries is increasing more rapidly, perhaps, than any other art which pertains to mining. The use of artificial fertilizers grew out of the trade in guano. These heaps of bird dung were first made use of by the Peruvians. The account of Garcilasco de la Vega, published in 1604, relates that the Peruvians in the Twelfth century used guano beds as a source of fertilizers. Of such importance did they esteem the material of these beds that the penalty of death was imposed by the early Incas upon any one found killing the birds which made these precious deposits.

For many years the guano beds of the western coast of South America and other similar deposits within the tropical region supplied the demands of our gardens. As the supply of these guanos approached exhaustion and the price increased, the skill of chemists and geologists showed the manufacturers where to find and how to treat deposits of mineral phosphates in such a manner that they might substantially serve to replace the manures of animal origin. In bulletin No. 46, of the United States geological survey, Dr. R. A. F. Penrose, Jr., now assistant state geologist of Texas, has given an important treatise on phosphate deposits, and although his report mainly concerns the phosphates of North America, it gives a synoptic account of the known beds of this nature in all parts of the world. The report makes it plain that only a small part of the deposits of this nature are yet known to us.

The process of discovery of these valuable resources is now, and for a long time will be, slow, and this for the reason that the material occurs in forms which are unfamiliar to the public or even to the ordinarily trained prospector who seeks for mineral resources. In most cases the material appears either in the form of greenish crystals or in the shape of nodular masses looking much like claystones. In neither of these shapes is it likely to attract general attention. In fact the great deposits at Charleston, S. C., had been in view for a century or more. Concretions of cerne phosphate were dug up in the ditches of the rice fields and condemned as worthless until after the war, when a native chemist, once a man of fortune, but brought to need by the havoc wrought upon that country during the rebellion, groping about to find some means of mending his resources, analyzed the rejected stones. As the result of his inquiry they became the very foundation of the commercial prosperity in his state. —N. S. Shaler in Boston Herald.

Curiosities of Natural Gas.

One writer asks whether it is safe to bore the earth too much. He assumes the earth to be a hollow sphere filled with a gaseous substance called by us natural gas, and he thinks that tapping these reservoirs will cause disastrous explosions, resulting from the lighted gas coming in contact with that which is escaping Earthquakes, he says, are probably caused by vacuums created by the outflowing gas. He compares the earth to a balloon floated and kept distended by the gas in the interior, which, if exhausted, will cause the crust to collapse, affect the motion of the earth in its orbit, cause it to lose its place among the heavenly bodies, and falls in pieces.

Another writer thinks that boring should be prohibited by stringent laws. He, too, thinks there is a possibility of an explosion, though from another cause. Should such a disaster occur, "the country along the gas belt from Toledo through Ohio, Indiana and Kentucky will be ripped up to the depth of twelve or fifteen hundred feet, and flopped over like a pancake, leaving a chasm through which the waters of Lake Erie will come howling down, filling the Ohio and Mississippi valleys, and blotting them out forever."

Still another theorist has investigated the gas wells with telephones and delicate thermometers and he announces startling discoveries. He distinguished sounds like the boiling of rocks, and estimated that a mile and a half or so beneath Findlay the temperature of the earth is 3,500 degs. This scientist says an immense cavity exists under Findlay, and that here the gas is stored; that a mile below the bottom of the cavity is a mass of roaring, seething flame, which is gradually eating into the rocky floor of the cavern and thinning it. Eventually the flames will reach the gas, a terrific explosion will ensue, and Findlay and its neighborhood will be blown skyward in an instant. Such are some of the theories gravely propounded in respect to this new fuel.—Professor Joseph F. James in Popular Science Monthly.

Appropriately Named.

A physician of this city received the following letter recently: "Dear Sir—Today is Wednesday. I have freckles, and am going to a party Saturday. Send me something that will remove them by then, and oblige, Miss Mary Gall." The doctor thought the signature corresponded well with the request, and sent the young lady his regrets, "to be taken before meals three times a day."—Pittsburg Bulletin.

Contending with Rooks.

In the autumn when the nuts are ripe the rook is busy. Walnuts are his especial favorites. You will not see a bird near the place until they are ready for thrashing down; but when that time has come a solitary pioneer will appear first, high up, inspecting the tree or trees. The next day he will be joined by one or two more. After wheeling about and over the place they will settle and examine the state of the crop. If the outer rind is loosened from the shell of the nut, a problem soon solved by the birds' biting a piece off, they will fly away and give information to the rest that luxuries are to be had. Then a number come, nipping the nuts off in the most wholesale manner and flying off with them.

In the first field or meadow they dine: with a dig or two of the powerful bill they split off the outer covering, and then with one more dig open the nut and eat the contents. They are quickly back for more. "Hi! Gip! Rooks!" cries a man's voice, and a fine old dog dashes over the lawn a dozen times a day, barking his loudest to scare them off, for if left to themselves they will clear the heaviest crop from the trees in a very short time.

It is no use thinking of shooting them, you may point a stick at them and flourish it about as much as you like, and it will not disturb them in the least. A gun is a different matter: only let them catch sight of one, and instead of committing their robberies in an open and deliberate manner, as is their usual way, they will clatter into the trees like hawks when they get a chance, nip off the nuts and fly away.

The only effectual plan is to trap one. I once saw the experiment tried. One of them hopped into a common trap, set openly, only so secured that the bird could not fly off with it. Finding himself in trouble the rook yelled out his note of alarm. Up the others clattered, cawing their loudest and dropping some of their plunder. All their friends round about came to see what was the matter and to join in the uproar. Flying round and dashing down to him as though to get him out, and finding this no use, they were frightened out of their wits by their comrade's frantic shouts, and they mounted high up in the air, cawing their loudest.

When the captive had his neck twisted, and he was spread eagled out on a stick for his companions' inspection, the business was settled; not a single rook has been near the place from that time. I have often proved the fact that shooting some does not affect the rest in the least; but trapping one upsets the whole rookery for a long time. When that calamity has once taken place it is put down in their notebook, and no matter what may be the attractions of the locality, it is shunned with the greatest caution.—Cornhill Magazine.

The Future of Russia.

Not only is Russia the greatest military power in the world, but she is the European power with the largest homogeneous population and the greatest expansive force. Territorially she has the largest empire, possessing a vast share of the Old World, and hers is a people full of patriotic and religious spirit and so well disciplined that all except an infinitesimal minority obey cheerfully and without question under all circumstances, whether good or evil, the will of a single man. Yet, although subject to what, with our parliamentary ideas, we are disposed to style despotism, the Russian people are full of spirit and of those qualities which we consider specially Anglo-Saxon—"pluck" and "go." Russia has absorbed with rapidity, but with completeness, the greater part of Central Asia, has drawn steadily nearer and nearer to our frontier and has made herself extremely popular with the people she has conquered. Her policy throughout the century has been apparently fixed in object, but pursued with patience; and while there seems to be no reason to suppose any probability of a speedy collision, which England will do nothing to provoke, it is impossible for those who are charged with the defense of India to shut their eyes to the possibilities or even the probabilities of the future.—Sir Charles Dilke in Fortnightly Review.

She Was Not Dead.

In London recently a well known artist of the camera was called in to photograph the body of a young lady who had just died under peculiar and distressing circumstances. The body was laid on a sofa in the drawing room and presented a singularly beautiful spectacle. The photographer was left alone in the room with the body and took a negative. After inspecting it he was not satisfied that the exposure had been sufficient, and he took another. And then, to his amazement, he discovered that the two negatives were not alike. The body must have moved Not having lost all his nerve by this extraordinary occurrence, he took a third negative, which was exactly like the second. He instantly summoned the nurse who had been in attendance on the deceased girl, and after some difficulty and delay had the doctor fetched. To cut a long story short, the young lady was not dead at all. This is a true story. — Atlanta American.

Natural Big Head.

C. W. Russell, a prominent business man, wears the biggest hat in town, if not in the whole country. He is a large, well proportioned man, and one would not for a moment imagine he wore an 8¼ hat. It is a fact, however. There is only one establishment in the country where they have a block large enough to build a hat for Mr. Russell, and that is located at Bethel, Conn. In all probability Russell would have to go hatless if the manager of the Bethel factory had not made a block expressly for him. Mr. Ames exhibited this enormous hat to a large number of persons yesterday. It fitted a man who wore a 7¼ hat like a circus tent over a balloon. A box had to be made specially for it. The brim is a fraction over three inches wide from the body to the rim all around.—Chicago Herald.

LONG LIFE

There is nothing in the world more generally desired than long life, yet the majority of people put on earth do their best—not because they are really careless, but because we live on lives at such a pace we have not time to give the subject sufficient thought until we receive a reminder in the shape of a severe illness.

Then, too, we are constantly bewildered by the various schools of medicine, and the physicians who represent them, and often blunder in our choice of a doctor.

If people only knew that the very best health-keeper, life-preserver, and disease preventer that has yet been discovered, is simmered down into a concentrated and very palatable form in the shape of New Style Pleasant Taste Vinegar Bitters, they would not hesitate a moment to try it.

But they do not know. How can they know, when so many not only worthless, but positively injurious drugs are constantly flooding the market under various names guises, that the New Style Vinegar Bitters is as bad as any of them?

They do not know, of course, unless they have the courage to try the New Style. It straightens out a tangled system in a very short while, and those who buy it once buy it always.

Why don't you try it, reader? It is sent out by a responsible house, and is exactly as represented. It costs but a dollar for a very large bottle. Try once and you will never be so glad of anything in your life. Your druggist may not have it, but he will order it for you. Be sure it says New Style Pleasant Taste on carton and bottle before you take it. Try it, and you will be happier than if you had found a gold mine, for it really is a mine of health.

Free from alcohol and opium; composed of expensive herbs and root with a fine, delicate flavoring.

RHEUMATISM AND NEURALGIA

These twin diseases cause untold suffering. Doctors admit that they are difficult to cure—so do their patients. Paine's Celery Compound has permanently cured the worst cases of rheumatism and neuralgia—so say those who have used it.

"Having been troubled with rheumatism at the knee and foot for five years, I was almost unable to get around and was very often confined to my bed for weeks at a time. I used only one bottle of Paine's Celery Compound, and was perfectly cured. I can now jump around, and feel as lively as a boy." FRANK CAROLL. Eureka, Nevada.

$1.00. Six for $5.00. Druggists. Mammoth testimonial paper free.

WELLS, RICHARDSON & Co., Props., Burlington, Vt.

"Paine's Celery Compound has been a God-send to me. For the past two years I have suffered with neuralgia of the heart, doctor after doctor failing to cure me. I have now taken nearly four bottles of the Compound, and am free from the complaint. I feel very grateful to you." CHAS. H. LEWIS, Central Village, Ct.

Paine's Celery Compound

"I have been greatly afflicted with acute rheumatism, and could find no relief until I used Paine's Celery Compound. After using six bottles of this medicine I am now cured of rheumatic troubles." SAMUEL HUTCHINSON, So. Cornish, N. H.

Effects Lasting Cures.

Paine's Celery Compound has performed many other cures as marvelous as these,—copies of letters sent to any address. Pleasant to take, does not disturb, but aids digestion, and entirely vegetable; a child can take it. What's the use of suffering longer with rheumatism or neuralgia?

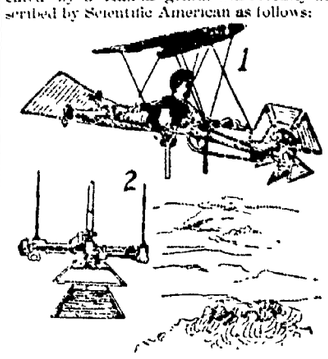
SCIENCE AND PROGRESS.

THINGS DISCUSSED BY PROGRESSIVE MEN AND WOMEN.

An Illustrated Description of a Machine Designed for Navigating the Air and Giving Best Results in Flight with Least Expenditure of Power.

The air ship illustrated herewith and patented by a Kansas genius was recently described by Scientific American as follows:



THE HOLMES AIR SHIP

The horizontal frame of the machine is suspended by hanger bars from an aero-plane, which is a red frame covered on one face by a silken fabric. Toward its rear there is attached to the side bars of the horizontal frame a canvas forming a rest or support on which the aeronaut will lie, face downward, on his breast and stomach, so that his hands may conveniently reach two transverse cranked shafts, by working one of which he can alter the incline or pitch of the aero-plane, while with the other he can rotate a propeller wheel journaled at the front of the machine. At the rear is a rudder sail, on the sides of which lie sacks to receive the legs of the aeronaut, and allow him to guide the machine by his legs in its flight. The aero-plane is arranged to be rocked up and down, and locked at any desired adjustment, for utilizing wind currents and the propelling force of the wind to the best advantage.

Fig. 2 is a front view of the propeller wheel, which is operated by a chain belt from the cranked shaft in front of the aeronaut. The hub of the propeller is fixed to a tubular shaft journaled in boxes formed at the end parts of sleeve cams and in half boxes held to the opposite side bars of the frame, to cause feathering of the blades, so that they will be held edgewise to the wind during their passage through the air above the level of the propeller shaft, and will turn their blades flatwise to the wind during their passage around below the level of the shaft, this construction and action of the propeller assuring its maximum lifting and propelling power to raise and urge the air ship forward.

How to Preserve Ropes.

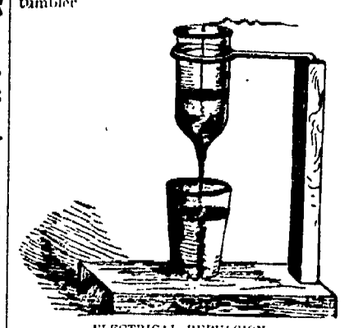
It is often very important to prevent the deterioration of ropes used in erecting scaffolds which are to remain up some time, and especially in places where the atmosphere is more than usually liable to attack the hemp. It has been recommended to soak the very dry ropes in a bath containing ninety grains sulphate of copper per gallon of water, allowing them to remain three or four days, afterward drying them. This treatment protects them as well against the attacks of insects. The copper may be fixed either by a coating of tar or by a solution of soap in water. For tarring the ropes it is preferable to pass them through a bath of boiling tar, then draw them through a ring which compresses them, to extract the excess of tar, afterward hanging them up to dry. In the other process the ropes are soaked in a solution of soap and water, containing 450 grains of soap to one gallon of water. The salt of copper which forms in the fibers preserves them better than the tar, the action of which is merely mechanical.

Fire and Water.

The following curious experiment, suggested by The National Educator, may not be new to the professional chemist, but will be of interest to the chemist student: Fire under water can be produced by placing a small piece of phosphorus in a conically shaped glass filled with water, and some crystals of chlorate of potash covering the phosphorus, and then pouring through a long tube funnel, or a glass tube, a few drops of sulphuric acid down on the mixture at the bottom of the glass. Tongues of flame can be seen flashing up through the water. The intense chemical action produces sufficient heat to inflame the phosphorus under the water. Where there is sufficient heat and oxygen fire will burn, whether in air or water.

The Electric Fountain.

The apparatus illustrated in the following cut is designed to show upon the screen the experiment known as the electric fountain. A small glass vessel provided with a capillary tubulure at the bottom is supported above a tumbler



ELECTRICAL REPULSION

The vessel is filled with water, and the capillary aperture allows the water to drop slowly when acted upon by gravity only, but when the water is electrified by connection with a static machine or induction coil it issues in a fine stream, the change in the character of the discharge being caused by the mutual repulsion of the particles of water. In this experiment, further explains Scientific American, from which the above was taken, an erecting prism is required.

Things That Never Will Be Settled.

Engineer says that among things that never will be settled are the following:

Whether a long screw driver is better than a short one of the same family.

Whether water wheels run faster at night than they do in the daytime.

The best way to harden steel.

Which side of the belt should run next the pulley.

The proper speed of line shafts.

The best way to lace belts.

Whether compression is economical or the reverse.

The principle of the steam injector.

Recipe for Water Proof Ink.

Scientific American gives the annexed formula for making a water proof writing ink, an ink which will not blur if the writing is exposed to rain. Dissolve 2 ounces shellac in 1 pint alcohol (95 per cent.); filter through chalk, and mix with best lampblack.

ALL AROUND THE HOUSE.

Decorative Novelties, Including Things Useful, Unique and Attractive.

Bandeau fringe, for trimming mantels, is made of heavy ropes of silk of different colors, varying in length from six to twelve and eighteen inches, with fringed out tassels at the ends. The fringe is laid over plush and tacked around the mantel plain. The same style of trimming might be very effective made of manilla rope of different sizes, adding silk to the fringed out tassels if desired. Decorator and Furnisher, which describes the above, includes also the following among other useful decorative hints:

A corner table may be made of deal on three legs, covered with diagonal serge, Roman sheeting, or plush, embroidered or painted. Chinese cash—the Chinaman's penny, with a hole in the center—might be very effectively arranged on a valance of this kind. Any carpenter could make the table at very little expense, and when the legs are painted and the top covered it fills a corner admirably and is an ornamental receptacle for books and bric-a-brac.

Curtains are looped back with two or three rows of graduated perforated brass beads of good size. Beads, especially the cheap colored Egyptian ones, lately imported, are very much used for looping curtains for windows or fireplaces.

Small camp stools with cretonne or plush bags attached to them are very convenient work receptacles. They are nailed to the stool and do not prevent its folding up, so the whole thing can be carried about and is most useful. The bag has a square base to fit the camp stool, and is about sixteen inches high, with a draw string about three inches from the top, and has no lining.

Saddle bag upholstery is very popular at present. It takes its name from the handsome looking saddle bags used in Egypt, thrown across the backs of donkeys and mules. Originally the real things were used, brought home from the east, but when the demand became great, home industry was brought to bear upon the subject, and the result was an excellent reproduction of the colors, designs and soft velvet pile of the eastern article. The saddle bags are small square mats, and they are adapted as the back, seat and arms of a chair put on diamond ways. They are also occasionally used as covering for the low divans which some people have a fancy for, in one corner of a small room between a window and a fireplace. Headrests for easy chairs are made saddle bag fashion and scent sachets to hang about the room are fashioned after the same pattern.

Hand Screens.

The handles of many of the fan shaped hand screens are very long. Some of the newest of these screens are in the shape of large flowers or leaves exquisitely painted; others are charmingly decorated with embroidered designs. A very beautiful one copies the iris in form and color.

SCREEN FANS.

In the cut is shown the geranium fan representing in form the natural leaf, and exquisitely painted after nature; the other fan illustrates the whim for copying insects as well as flower and foliage, and is also beautifully painted to make the illusion as perfect as possible. Both have gilt mounts.

Stained Floors.

Oak, black walnut, cherry and mahogany stains can be prepared at any good paint shop or bought in tin cans ready mixed for use. First have all rough or uneven places in the floor smoothed off with a plane, and all cracks filled; then put the stain on with a broad brush, following the grain of wood. After the second coat of stain is dry, varnish with "spar varnish," so called because used for the spars of vessels. Put on a second coat of varnish as soon as the first is quite hard. This varnish is very hard and will not scratch like other varnishes. Unless the floor has hard usage, once a year will be often enough to revarnish. It can be washed with tepid water. Never wax it if you wish to revarnish, as the varnish will not adhere to a waxed surface.

Fruit in Jelly.

One half box of gelatine, one cup of sugar, one cup of sherry, one cup of boiling water, one-half cup of cold water. Soak the gelatine in cold water one hour. Pour the boiling water over it. Add the wine and sugar, and strain. Wet a mold, arrange preserved strawberries around the top and pour a little partially formed jelly on this. Next place a layer of preserved raspberries, then more jelly, and then a layer of pineapple, cut in small pieces. More jelly follows, and so on until the mold is full.

A Dinner Party Novelty.

At a recent fashionable dinner each guest found beside his or her napkin a fancy pin to fasten it to the waist or the table cloth. The pins were of gold with tiny pearls set in the round tops for the ladies; of silver, with an enameled flower head, for the men. Nobody dropped a napkin and everybody was grateful. People will spend on these pretty notions after Easter some of the cash they have been lavishing on boutonnieres and menus.

How to Cook Hominy.

There is an old rule about cooking corn which holds good with regard to hominy: "Cook until it is done, and then cook as long again." Hominy, such as is now bought in the market, put into plenty of salted boiling water in a double boiler (which lessens the danger of burning), and cooked for one hour, will perhaps approach to the old fashioned article.

Fish Roe Salad.

Boil shad, herring or any fish roe, cut in thin slices and put in a salad bowl in alternate layers with sliced tomatoes. Garnish with lettuce and serve with the following French dressing: To four teaspoonfuls of vinegar, add half a teaspoonful of salt and one-eighth of a teaspoonful of pepper; mix and pour over the salad, then add olive oil to taste.

Halibut and Tomatoes.

Freshen to taste a piece of smoked halibut and lay it without breaking on a buttered earthen baking dish; on the top put a tablespoonful of finely chopped onion, dust it with pepper and pour over it a pint of canned tomatoes or sliced fresh ones; bake half an hour in a moderate oven and serve hot in the dish in which it was cooked.

Fig Cake.

One and one-half cups of sugar, whites of five eggs, scant three-fourths of a cup of butter, two and a half teaspoonfuls baking powder, half a cup of milk, two cups of flour; bake in a sheet. Make boiled icing and put in one cup of finely chopped figs.

WHAT SHALL WE WEAR?

ITEMS ABOUT DRESS AND FASHION OF INTEREST TO EVERY WOMAN.

The New Spring Millinery—Styles Introduced at Recent New York Openings. Features of the Imported Hats and Bonnets.

The millinery displayed at recent New York openings includes plain and fancy straw bonnets for general use and thin materials for making more dressy bonnets, such as tulle, silk muslin, crepe, figured net and lace.

A PARISIAN SPRING BONNET.

Chips, open work straws and plain Milan braids, in white, black and all the new colors, are shown for spring capotes. In some cases two colors appear in one bonnet. The small close capote with low trimming will be the bonnet for spring, with the toque for its special rival. Low crowned round hats of medium size will be worn early in the season in city streets, while later on very large wide brimmed hats will be adopted for country use.

Narrow ribbon strings, also lace ties, are to be seen on many of the bonnets, although there are numbers of bonnets without strings. In the cut here given is shown a stylish Paris bonnet, without ties. This bonnet is made of black net, richly embroidered in gold, but jetted tulle might also be used. The feathers are shaded green and gold, the aigrette and ribbon correspond with the feathers. Brocaded ribbons are one of the features in spring millinery.

For Small Boys.

Simple dresses for boys from 2 to 5 years old have a kilt skirt of white pique sewed to a silesia waist that fastens behind. Over this is worn a nainsook sailor blouse, with a blue collar in large sailor shape, with cuffs to match, edged with feather stitching, red, white or blue. A box plent of the pique is down the blouse front, and there is a high standing collar above the sailor collar, both of which are feather stitched. Plainer dresses are similarly made with a skirt of Scotch plaid gingham or in stripes, with gingham collar, cuffs, and front plait on a white nainsook blouse. One piece dresses for boys of 2 or 3 years are made of gingham or plain Chambery, tucked down the back to the end of the pocket hole, with three similar tucks in front from each shoulder down below the waist, and the front space filled in by a shirt bosom of plaited pique or nainsook. Turned over collar of pique and cuffs to match.

Mothers put gay plaid and striped ginghams on their boys as well as on their girls, but the plaids should not be too large. Brick red plaided with white, or red with blue, and green with yellow bars, are worn by boys as well as the gray, blue and brown plaids formerly chosen for them. The colored piques of plain buff, or with blue bars on white or red on cream color, are also suitable for boys. Their best white pique frocks have insertions of embroidery above the hem in the kilt, and deep Vandyck collars with pointed cuffs of embroidery.—Harper's Bazar.

Children's Pinafores.

Some quaint white and colored pinafores are made of washing silk, in the usual shape, fastening round the shoulders or neck at the back, and again at the waist. There is a broad band round the waist, ending in long ends to tie in a bow, and a fall of lace round the edge of the pinafore, the neck and sleeves. The lace near the throat is put on to a frill of the silk and looks like a berthe. There are the overall pinafores, with three tucks near the edge, a honey combed yoke, and full sleeves gathered into little wristbands. In silk, these overalls for very small children are the prettiest little garments possible, and sometimes are embellished with a sash tied round the waist. The miniature smock frock is another variety of pinafore, chiefly carried out in brown holland, and intended for little boys. There are many pretty fancy muslin pinafores for children of all ages.

Little Girls' Dresses.

For both day and evening wear there are some charming little directoire costumes, with cashmere coats, soft silk petticoat fronts, and revers, cuffs and sash of soft silk. Smocked yokes, waists and sleeves are much employed in little girls' gowns. In the accompanying illustration are shown two pretty models, one of which is smocked.

LITTLE GIRLS' DRESSES.

The smocked gown is designed for a girl of 5, and is made of red cashmere and trimmed with three rows of black braid. The yoke, waist and sleeves are smocked in black. The remaining cut shows a dress for a girl of 4. This is of fine white woolen fabric, embroidered in blue. The skirt consists of five flounces of the embroidery.

PHYSIOLOGY AND HYGIENE.

The Nervous System and Moods That Result When It Is Out of Order.

"Nothing in nature is more marvelous than the network of nerves which we call our nervous system. Each nerve is a telegraphic cord in itself. Each is a part of the whole complex and inimitable system of telegraphy by which messages from the headquarters in the brain are sent to the minute stations in the extremities."

When we are glum and dismal and low spirited it is, according to the writer already quoted, because the telegraphic apparatus is out of order and the nerve force demoralized. When nerves work wrong it is as when telegraphic poles are shaky or wires tangled or crossed or currents irregular or batteries confused.

According to the irregularity of our nerves, so are our irregular moods. If all is right, we are happy and cheery and sunshiny. But let the batteries blunder, or the currents cross, or the wires become entangled, and we are irritable, sulky, ill tempered, or angry, as the case may be. In some of our distressful moods we pout and sulk, and misinterpret, and misunderstand. We take offense where no offense is intended, and we impute to others motives which are never conceived by them.

At times, when the moods are out of sorts, we think the whole world is persecuting us, and we, the afflicted objects of persecution, are, above all other human creatures, singled out for martyrdom. There are circumstances under which most of us can, without insuperable difficulty, rise from the moodiness which is brought about by letting the nerves have their own way. Mental and physical diet has much to do with it. Brooding over real sorrows and imaginary miseries will make the best of us moody and wretched. Nursing grief and affronts and telling the sad story of our woes has as depressing an effect as narcotic drugs.

Sleeping in unventilated rooms often produces chronic wretchedness, even if these rooms be furnished with the appliances of wealth and refinement. Good health, mental, spiritual and bodily, is worth working for and more easily attained than most folks suppose.

Vaccination.

In Paris, where the law requiring vaccination is feebly enforced, the mortality from smallpox ranges from 136 to 10.1 to the 100,000 inhabitants, while in the principal German cities, where the vaccination laws are rigidly enforced, the death rate is but 1.44 to the 100,000 inhabitants. London, under compulsory vaccination, has a death rate from smallpox of but 0.6 to the 100,000 inhabitants. On the other hand, according to The Scientific American, which is authority for the above, in the canton of Zurich, in Switzerland, since the compulsory vaccination law was repealed in 1883, the death rate from smallpox has risen steadily from 8 to 85 to the 100,000 inhabitants.

One Theory of Pneumonia.

A German-American physician of New York holds that pneumonia is a house disease. He says: In the warm air of the house the system is made sensitive to the cold, but the cold is only the producing cause. It prepares the coddled lungs for the pneumonia poison, which has its real origin in damp and dirty rooms or cellars. What is the cure? Well, the steps to cure have unhappily advanced but little. But the relief and the prevention are no medicine and plenty of fresh air.

Application for Gout, Etc.

The following formula for an application for gout and rheumatism is found in Science News: Ether, fifteen parts; flex. collodion, fifteen parts; salicylic acid, four parts; morphine, one part. Paint hourly on the affected joints.

SOCIAL ETIQUETTE.

Stationery for Polite Correspondence and the Proper Form of Notes and Letters.

It is almost unnecessary to say that ruled paper is no longer fashionable for correspondence, formal or informal. But as there are on the market a great variety of fanciful papers chiefly remarkable for bad taste and eccentricity of coloring and form—papers adorned with mottoes, with flowers or even animals, paper with torn edges or gilded edges, with envelopes extremely long and narrow and opening at the side, and various similar inventions. The following advice, from Good Housekeeping, as to what is the best form in stationery for note and letter writing, is quoted:

Deep colors are always out of taste, and even in tinted paper care should be used that it be of the most delicate tones, as soft grays, dull blues and cream or light coffee color; pink and green are without the pale. There is one choice which is always safe; the cream white, thick linen used of the size suitable for note or letter, and this has also the merit of being unaffected by the changes of fashion. Many ladies pride themselves upon the rigid simplicity of their paper and its accompaniments, and keep always to the same kind; for older ladies this habit is particularly appropriate. We know of one who clings to a very thin foreign paper of a dull lead blue, and to those who have learned to value her characteristic letters, the sight of the envelope is as a grasp of her hand.

There are many fancies in which a young lady may indulge and still keep within the bounds of good taste. The intricate and gorgeous monogram which so inspired collectors a few years ago is creeping back into some degree of favor, but simple a letter or combination of letters, stamped in one color or in silver or gold, is a prettier device; these letters are usually placed across the upper left corner of the sheet and are not seen on the envelope, which should be sealed with wax. A very sensible custom has come into vogue of having the name of street and number of house at the top of the paper.

The question is often asked if the use of perfumed paper is allowable. There can be no objection to it in social notes, but the odor should be of the most delicate nature. A faint touch of orris is perhaps best, and heliotrope or violet is pleasant, but the heavier odors, as musk or patchouli, are vulgar in the extreme.

Now as to the letter and note paper. The date of a letter should be written in the upper right corner, near the top of the page. The address should be placed there also, unless stamped upon the paper, in which case it is, of course, unnecessary. In a note the date is more often at the end, below the signature, and the name of the person addressed occupies the corresponding side. Never date a letter vaguely; it may seem a trivial matter at the time, but do not forget to write day of week, month and the year; it is far more elegant to do so, and may save the recipient much trouble if figure reference be made to it.

The Morality of Fashion.

Take her for all in all, fashion has her morality. She loves punctuality, politeness, a certain solvency; her votaries must pay their social debts. She loves an easy naturalness, a cordial salutation, a suitable and moderate gesticulation. She does not love exaggeration except in dress. Indeed, the morality of fashion includes good taste, if there is such a thing.

—Wednesday evening, as P. LaTourrette was passing along west Center street, beyond the C. and T., he was assaulted by a trio of unknown toughs who struck him with a sand bag, knocked him down and rifled his pockets, securing his pocketbook containing a small amount of money, and his watch and chain. After committing the robbery they disappeared in the darkness. He hurried up town and secured the police who, after a thorough search, failed to find them. LaTourrette says he recognized them as some bums he saw on the street, hanging about town Wednesday afternoon.

Marital.

Henry Welsh and son Sanford, of Wyandot, made a flying business trip here Monday.

Irvine Bros. loaded stock here Monday, April 3rd. LORD BYRON.

Obituary.

DIED.—At the residence of her husband, on west Silver street, Mrs. Menerva Showers, wife of Mr. Charles Showers, of Marion, O., and daughter of Mr. John F. F. Berry deceased.

She was born in Pleasant township, Marion County, Ohio, March 2, 1842. Was united in marriage with Mr. Charles Showers April 8, 1862. In November 1888 she professed faith in christ and united with the U. B. Church and received the ordinance of Baptism administered by Rev. J. L. Hensley, pastor of that church.

She died March 31, 1889, aged 47 years and 25 days. Her funeral service was held in the U. B. Church, on south West street. A very large audience was in attendance. The Sermon was preached by Rev. J. L. Hensley from the words "But now they desire a better country, that is in Heaven."

The music was good although the choir was not full. Miss Laura Collins led the music in the use of the organ in a very appropriate manner. The remains were deposited in the vault.

For Sale.

Twenty-one Lots on Greenwood street; also 20 acres suitable for city lots within four squares of New Huber Shops. See E. B. DURFEE.
